

# **Senior Data and Visualization Engineer (Team Lead)**

## **About Dogico**

Dogico is a small Canadian Software and Data Pipeline Development company in operations since 1998.

Our mission is to seize opportunities to use our competencies, processes and creativity to continuously create value for our clients.

Over the years, Dogico has taken responsibility for the planning, development, maintenance and evolution of groups of Applications and Data Pipelines following an “agile offloading” approach where clients get the benefits of outsourcing without the overhead and cost while keeping strict control on their strategic assets.

## **Reports To**

Data Practice Manager

## **Summary**

The Senior Data and Visualization Engineer bridges the gap between client data requirements and the technical teams involved in building the data pipeline to fulfill these requirements. The candidate will be responsible for the integration of each request in the client’s data model and for maximizing the re-usability of the data pipeline.
